

## Liquid Floor Hardener

Home care Liquid Floor Hardener is a ready-to-use solution designed to harden a wide variety of cementitious surfaces. When LFH is applied, it penetrates the surface and it reacts with the free calcium hydroxide to produce a by-product, which fills up the pores on the surface.

## Benefits

- Penetrates deep into the surface to harden and decrease the porosity of the surface.
- It improves the light reflectance and on polishing the surface results in permanent and attractive sheen.
- It provides a touch protected surface that does not discolor or show pedestrian

- or vehicular wear marks.
- Improves the chemical resistance and slip resistance of the surface.
- Protects the surface against scratching or peeling thus marking it dustproof.
- Ready to use and can be easily applied.
- It can be applied in new as well as old construction.
- VOC content is nil, thus helps earning LEED points in green building earning.
- It is economical to use.

## Usage

- LFH is recommended for use wherever hardened, dustproof and improved chemical and abrasion resistant surfaces are required. Ideal applications include floors of industrial plants and warehouses, storage silos, sewage plants, chemical processing facilities, refineries, car parking heavy pedestrian traffic areas such as malls, stadiums, hospitals, airports and public places. Where aesthetics is required on polishing the surface a high sheen is obtained.
- It can be sprayed on concrete structures to improve the life of the structure.
- In Green building, as it is VOC compliant.
